

SURVEY OF U3A MEMBERS (PART 1)

Introduction

To provide a satisfactory service to its member U3As, The Third Age Trust recognised that it needs to be aware of the diversity of individual U3A members and their views of the services which the Trust provides and it therefore initiated a survey which was carried out in the spring of 2009. The last such survey was conducted in 2001 and, where available, comparative figures are provided in this report, though the wording of the questions was not always identical.

The objectives of the survey were:

1. to update basic knowledge of membership to include such data as age range, gender distribution, length of membership, experience of formal education, the ways in which the members participate in various activities;
2. to find out how the individual members view the services provided for them and for the U3As to which they belong by the Third Age Trust;
3. to know what, if anything, members would like the Trust to provide which is not already provided, and how they would like to see the future development in general.

This purpose is being addressed by a two-stage survey. First a sample of members has been invited to provide basic details about themselves, their involvement in their U3A and their use of Third Age Trust services (objectives 1 and 2). They were invited to give names and contact details so that the first survey could be followed up by further approaches in which they will be asked to give more specific comments and suggestions (objectives 2 and 3).

In November 2008, when there were 698 U3As and 207,307 members, a sample of U3As was selected at random with the objective of producing statistics at (a) regional level and (b) size of U3A. There are 12 Regions in the UK. The total was divided into those termed Small (under 300 members), Medium (300-599) and Large (600 and more), though the terms are used in a relative sense. Questionnaires were issued to a sample of U3A Chairmen with a request that they should be issued to a sample of members. Instructions were included on how to select at random 10 (small), 15 (medium) and 20 (large) individual members.

The number of useable responses, excluding those received too late for inclusion and those returned blank, was 2,819 representing 66% of those issued. The main report includes differences by U3A size. Regional analyses for Part 1 are shown in Annex 1 where the smaller size of some regional samples (see below) is reflected in the data. Full details of the sampling frame and methodology are provided in Annex 2.

Number of useable replies by Region and Size of U3A

West Midlands	70	77	53	200
Yorkshire & Humberside	64	85	68	217
ALL REGIONS	801	952	1,066	2,819

Thanks are extended to all those who participated in the exercise, those who selected the samples within U3As, those who completed the questionnaires and the staff at National Office who worked very hard to organise the work. The second part of the exercise will gather suggestions on how the Trust may improve its services and it is hoped that this will receive the support of those contacted.

PART 1: ABOUT MEMBERS

Gender

Table 1s: Distribution of membership by gender and by U3A size

<i>Size of U3A</i>	<i>Females (%)</i>	<i>Males (%)</i>
Small	74	26
Medium	70	30
Large	68	32
All sizes 2009	71	29
<i>All sizes 2001</i>	<i>74</i>	<i>26</i>

Latest UK estimates published by the Office for National Statistics (ONS) indicate a mid-2007 population over 60 (females) or 65 (males) of 11.562m. of whom 63% are female and 37% male (ONS). U3A membership represents 1.8% of that age group (see Table 8r in Annex 1 for a regional breakdown).

Age

Table 2s: Distribution of membership by age and by U3A size

<i>Size of U3A</i>	<i>Age of members</i>						
	<i>Under 60 (%)</i>	<i>60-64 (%)</i>	<i>65-69 (%)</i>	<i>70-74 (%)</i>	<i>75-79 (%)</i>	<i>80-84 (%)</i>	<i>85 and over (%)</i>
Small	3	16	18	26	20	12	4
Medium	3	16	22	21	23	11	4
Large	3	13	24	25	20	10	5
All sizes 2009	3	15	21	24	21	11	5
<i>All sizes 2001</i>	<i>6</i>	<i>15</i>	<i>24</i>	<i>25</i>	<i>17</i>	<i>13</i>	

Disability

Table 3s: Percentage of members with a disability

<i>Size of U3A</i>	<i>Do you have a long-standing illness, disability or infirmity that has troubled you over a period of time or is likely to affect you over a period of time?</i>		
	<i>Yes, and this limits activities</i>	<i>Yes, and this does not limit activities</i>	<i>No</i>
	<i>(%)</i>	<i>(%)</i>	<i>(%)</i>
Small	22	11	68
Medium	22	12	66
Large	20	9	71
All sizes 2009	21	11	68

The wording of this question was designed to be comparable with the General Household Survey (Bejekal et al, 2004). The 2007 GHS indicated that 58% of those aged 65-74 and 65% of those aged 75 or over reported that they had a long-standing illness as worded above (compared with 32% of U3A members in this survey) and that 37% of those aged 65-74 and 48% of those aged 75 or over had a limiting disability (compared with 21% of U3A members). (ONS, 2007, Table 7.2)

Living alone

Table 4s: Percentage of members who live alone

<i>Size of U3A</i>	<i>Do you live alone? (including alone in a "granny flat"/sheltered housing)</i>	
	Yes (%)	No (%)
Small	44	56
Medium	39	61
Large	38	62
All sizes 2009	40	60
<i>All sizes 2001</i>	<i>39</i>	<i>61</i>

The GHS 2007 estimated that 25% of those aged 65-74 live alone and 51% of those aged 75 and over (ONS, 2007, Table 3.2).

Ethnicity

Members were asked "To which ethnic group do you feel you belong?" and given the choice of "White" or "Other". Of the 2,743 replies to this question only 23 were "Other", i.e. 0.8%. This compares with 0.3% in 2001.

ANNEX 2: SURVEY METHODOLOGY

At national level the objective was to give 95% confidence of averages within +/- 2% and the sample size was designed with this in mind. In addition a comparison by region and by size of U3A was required so the sample was stratified. The database with each U3A and the number of members, as held in November 2008, was divided into those with under 300 members, those with 300-599, and those with 600 or more – a broadly even distribution of total members.

For the second level survey, of committee members and group leaders, the results will be analysed by size only.

The basis of the selection is shown below.
